Court Services Victoria & Ontoit, Australia

Shepparton Law Courts

Duration: 4 years; Budget: € 45 M

Project description
The $73 million Shepparton Law Courts form a new regional headquarters centered on the open and transparent delivery of justice in the city of Greater Shepparton and beyond. Spanning five levels, the building required innovative engineering and construction methods and a complex functional design to meet current community expectations and cater for multiple court jurisdictions in a single facility. The state-of-the-art building reflects contemporary applications of courthouse design, information technology, environmental sustainability, and changing justice delivery models. Comprising six main courtrooms servicing all jurisdictions, the new courthouse provides a safer environment for all users and more accessible justice services for the community. Opened in 2018, the facility was delivered with extensive stakeholder consultation and support from the local Shepparton community.
