Project:
Sir Seewoosagur Ramgoolam International Airport Expansion Project, Mauritius

Company:
China State Construction Engineering Corporation Ltd., China

Award status:
Bronze Winner in the category Mega-sized Projects

Project Description
The expansion project of Sir Seewoosagur Ramgoolam International Airport is located in Mauritius, which is proposed by the Mauritian Government due to the growing demand of tourists. It is expected that the annual amount of passenger arrivals will increase from one million in 2009 to two million by the year of 2013 when the airport delivered. The project was financed by the Export-Import Bank of China and the EPC contract was signed on December 30 2009 between ATOL (Airport Terminal Operation Ltd., the Client) and CSCEC (China State Construction Engineering Co. Ltd., the EPC contractor) with contract value of US$ 305 million. The work scope includes terminal building, apron, parking area, cooling station, emergency power station and subsidiary facilities. In view of its excellent performance on quality control, the project was awarded with Luban Prize, which is the highest award in China for construction quality. According to ACD (Airport Council International), the operation of project was ranked No.3 of the Best Airport by Region (Africa) in 2013, No.1 in 2014 and No.1 of the Best Improvement by Region (Africa) in 2015.
